

# ONLINE LEARNING PLATFORM

Our online learning platform website features a user-friendly interface with categories for courses, search functionality, as well as options to enroll or purchase courses.

Key components are as follows:

1. **\*Course items\*:**

Displaying available courses categorized by subject, level, or instructor.

2. **\*Course Pages\*:**

Providing detailed descriptions of each course, including syllabus, instructor information, duration, prerequisites, and learning outcomes.

3. **\*Enrollment Process\*:**

Offering direct enrollment or purchase options, sometimes with free trials or discounts.

4. **\*User Profiles\*:**

Allowing users to create profiles to track progress, access purchased courses, and interact with instructors or other learners online.

## 5 \*Progress Tracking\*:

Providing tools for learners to track their progress within courses, view completed modules, and receive feedback accordingly.

Programming Languages taught:

\*PYTHON\*

\*CSS\*

\*HTML\*

\*JAVASCRIPT\*

\*C\*

\*C++\*

\*JAVA\*

In a nutshell, the website aims to provide a seamless and effective learning experience for users seeking to acquire new skills or knowledge in a flexible online environment. We can access these courses anytime and anywhere according to our requirements.
